3M[™] High Performance Cut-Off Wheels

above the rest

THE TECHNOLOGY BEHIND CUBITRON™ II, PRECISION SHAPED GRAIN, IS NOW AVAILABLE IN A HIGH PERFORMANCE CUT-OFF WHEEL

3M[™] High Performance Cut-Off Wheels contain 3M's patented precision shaped grain (PSG) technology. They're faster cutting and longer lasting than conventional cutting wheels. PSG abrasives:

- Cut faster
- Last Longer
- Require less pressure
- Reduce operator fatigue
- Increase productivity

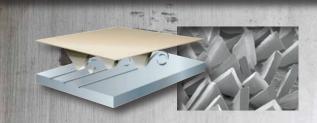

Conventional ceramic abrasive grain is irregular in shape. Instead of a clean, machining action, the grain "plows" through the metal, causing heat build up, slower cutting and shorter life.

3 REASONS WHY IT'S BETTER:

- 1. Cuts faster—helps improve productivity and throughput
- 2. Lasts longer—helps save money
- 3. Easier to use good for your workers, good for your business

LESS PRESSURE REQUIRED MORE MATERIAL REMOVED

Competitive products require up to 3 times the amount of pressure to match the cut of PSG abrasives.

3M precision shaped grain in High Performance Cut-Off Wheels continuously fracture to form sharp points and edges – slicing cleaner and faster, staying cooler and lasting many times longer.

THE PAYOFF

- Less wear and tear on your operators
 More material removed by the same amount of effort
 Improved productivity
- Less wear on your tools

USED IN INDUSTRIES SUCH AS:

- General Metal Fabrication
- Ship Building
- Structural Steel
- Oil and Gas Off-Site Maintenance
- Agriculture
- Industrial and Construction
- Machine Building

3M[™] HIGH PERFORMANCE CUT-OFF WHEELS

For the ideal combination of value and performance, choose 3M High Performance Cut-Off Wheels. They feature 3M's patented Precision Shaped Grain that results in faster cut, longer life and leaves a better finish. To be used on Stainless Steel, Mild Steel & Aluminium

Dimensions (mm)	Ordering Code	Max. RPM	Carton QTY

Product Use: All statements, technical information and recommendations contained in this document are based on tests or experience that 3M believes are reliable. However, many factors beyond 3M's control can affect the use and performance of a 3M product in a particular application, including conditions under which the product is used and the time and environmental conditions in which the product is expected to perform. Since these factors are uniquely within the user's knowledge and control, it is essential that the user evaluate the 3M product to determine whether it is fit for a particular purpose other than those already stated by 3M, and suitable for the user's method of application.

Limitation Of Liability: Except where prohibited by law, 3M and seller will not be liable for any loss or damage arising from the 3M product, whether direct, indirect, special, incidental, or consequential regardless of the legal theory asserted, including warranty, contract, negligence or strict liability.
