

Fill-Air *Rocket*™

Inflatable Packaging System

Introducing the Fill-Air *Rocket*™ inflatable void fill system, a void fill solution designed specifically to meet the needs of modern fulfillment. Drawing on decades of best-in-class inflatable void fill experience, the Fill-Air *Rocket*™ system is faster, simpler, lighter and better prepared for your packaging operations.

Fill-Air Rocket[™]

Inflatable Packaging System

Our Fastest Inflatable Void Fill System

10 Old Sherman Turnpike Danbury, CT 06810-4173

UNRIVALED SPEED

The Fill-Air *Rocket*™ system produces 100 feet of inflatable void fill cushions per minute in a variety of sizes—fast enough to keep up with the most demanding packaging operations. The system creates bags instantaneously, operating at maximum capacity the moment it is turned on.

SIMPLIFIED OPERATION

Simply plug in and load Fill-Air RocketTM system with film to blast off. No shop air is required. Two new features ensure further foolproof operation: active film web tracking, which automatically improves the film feed

SAVES VALUABLE SPACE

The Fill-Air *Rocket*™ system has a compact footprint (less than 1.5 sq. ft.) that makes it ideal for tabletop placement in decentralized environments. The system is fast enough to deliver packaging on-demand, but material can also be batched into bins and even delivered via our Jet Stream® delivery solution to feed multiple packers. An integrated, on-board, auto-replenishment sensor can be used to maintain a consistent supply of material at all times.

RECYCLABLE AND REUSEABLE

The superior sealing technology and material strength of Fill-Air® packaging makes it highly reuseable. If material must be disposed, Fill-Air® packaging loses 99.3% of its volume when deflated.

Sealed Air is proud to partner with *how2recycle.info*. Our Fill-Air $Extreme^{\text{M}}$ bags can now be recycled at local store dropoff locations nationwide. Visit *how2recycle.info* for more information.

VERSATILE FILM OPTIONS

Fill-Air *Extreme*™ and Fill-Air *Extreme Efficiency*™ films are available in three widths (8", 10" and 12") and can be converted to two different cushion lengths, creating six possible cushion sizes.
